

INTEGRIPod™ SM Kit

Stand-alone Motion Data Logger Kit

INTEGRIPod™

The **INTEGRIPod™ SM Kit** offers customers complete freedom and flexibility over **INTEGRIPod™** shipment, initialization, data download and data viewing.

INTEGRIPod™ software allows customers to configure, initialize, download data and carry out diagnostics of **INTEGRIPod™** loggers using a clear and user friendly graphical user interface.

INTEGRIVIEW™ allows customers to quickly view the data recorded on the **INTEGRIPod™** loggers. The software allows users to view time history data from all the sensors and generate statistical graphs showing maximum, minimum, mean and standard deviation over the recording period. Based on the quick review data, customers can decide if further data post analysis is needed.

The complete kit is contained in a hard carry case for easy transportation.

CONTENTS OF KIT

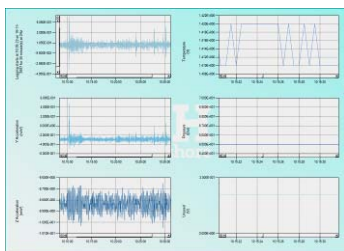

- 1 **INTEGRIPod™ SM** (can be upgraded to 3 loggers in one case). The logger is equipped with a tri-axial accelerometer. Other sensors can be fitted if required
- 1 128 Mb memory card
